

## Product Description

UrbanGRO is our premium-quality urban farming soil formulated with composted soil amender, sphagnum peat moss, and free-draining river sand.

Developed to meet the demand for a balanced, nutrient rich soil for use in food production, urbanGRO promotes balanced and healthy growth in vegetable and herb gardens.

UrbanGRO is the perfect solution for growers looking for a local, sustainable soil for home vegetable gardens, community gardens, and traditional planter applications for shrubs, trees, and ferns.

## Product Features
